

HSBC Global Investment Funds

GLOBAL EMERGING MARKETS BOND

Marketing communication | Monthly report 30 June 2025 | Share class AM3HSGD

Investment objective

The Fund aims to provide long term capital growth and income by investing in a portfolio of emerging market bonds.

Investment strategy

The Fund is actively managed. In normal market conditions, the Fund will mostly invest its assets in investment grade and non-investment grade bonds and other similar securities issued by companies, or issued or guaranteed by governments, government-related entities, supranational entities based in emerging markets, and primarily denominated in US Dollar. The Fund may invest up to 30% of its assets in securities issued by a single government issuer with a non-investment grade credit rating. Issuers considered for inclusion within the Fund's portfolio will be subject to excluded activities in accordance with HSBC Asset Management's Responsible Investment Policies. The Fund may invest up to 10% of its assets in onshore Chinese bonds which are issued within the People's Republic of China and traded on the China Interbank Bond Market. The Fund may invest up to 10% in convertible bonds. The Fund may also invest up to 15% of its assets in contingent convertible securities. The Fund may invest up to 10% of its assets in total return swaps and up to 10% in other funds. The Fund's primary currency exposure is to US dollars. See the Prospectus for a full description of the investment objectives.

Main risks

- The Fund's unit value can go up as well as down, and any capital invested in the Fund may be at risk.
- The Fund invests in bonds whose value generally falls when interest rates rise. This risk is typically greater the longer the maturity of a bond investment and the higher its credit quality. The issuers of certain bonds, could become unwilling or unable to make payments on their bonds and default. Bonds that are in default may become hard to sell or worthless.
- The Fund may invest in Emerging Markets, these markets are less established, and often more volatile, than developed markets and involve higher risks, particularly market, liquidity and currency risks.

Risk Disclosure

- Derivatives may be used by the Fund, and these can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.
- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Where overseas investments are held the rate of currency exchange may cause the value of such investments to go down as well as up.
- Investment involves risk. Past performance figures shown are not indicative of future performance. Investors should read the prospectus (including the risk warnings) and the product highlights sheets, before investing. Daily price change percentage is based on bid-bid price.

Index Disclaimer

Information has been obtained from sources believed to be reliable but J.P. Morgan does not warrant its completeness or accuracy. The Index is used with permission. The Index may not be copied, used, or distributed without J.P. Morgan's prior written approval. Copyright 2025, J.P. Morgan Chase & Co. All rights reserved.

Benchmark disclosure

The Investment Advisor will use its discretion to invest in securities not included in the reference benchmark based on active investment management strategies and specific investment opportunities. It is foreseen that a significant percentage of the Fund's investments will be components of the reference benchmark. However, their weightings may deviate materially from those of the reference benchmark. The deviation of the Fund's performance relative to the benchmark is monitored, but not constrained, to a defined range.
