

HSBC Global Investment Funds

US SHORT DURATION HIGH YIELD BOND

Marketing communication | Monthly report 31 March 2026 | Share class AC

Investment objective

The Fund aims to provide capital growth and income by investing in a portfolio of high yield securities that are related to the USA with an expected average duration of between 1 and 3 years whilst maintaining low interest rate risk.

Investment strategy

The Fund is actively managed. The Fund will invest at least 70% of its assets in non-investment grade and unrated bonds and similar securities issued by companies which are based in, or carry out the larger part of their business in the USA. The Fund may invest up to 10% in bonds issued by issuers that are based in emerging markets, up to 30% in investment grade bonds, up to 10% in bonds and other similar securities which have a maturity longer than five years and up to 10% in securities issued by any single government issuer with a non-investment grade rating. Issuers considered for inclusion within the Fund's portfolio will be subject to excluded activities in accordance with HSBC Asset Management's Responsible Investment Policies. The Fund may invest up to 10% in convertible bonds, up to 15% in contingent convertible securities, up to 10% in asset-backed securities and mortgage-backed securities, up to 10% invested in other funds. The Fund's primary currency exposure is to USD. See the Prospectus for a full description of the investment objectives and derivative usage.

Main risks

- The Fund's unit value can go up as well as down, and any capital invested in the Fund may be at risk.
- The Fund invests in bonds whose value generally falls when interest rates rise. This risk is typically greater the longer the maturity of a bond investment and the higher its credit quality. The issuers of certain bonds, could become unwilling or unable to make payments on their bonds and default. Bonds that are in default may become hard to sell or worthless.
- The Fund may invest in Emerging Markets, these markets are less established, and often more volatile, than developed markets and involve higher risks, particularly market, liquidity and currency risks.

Risk Disclosure

- Derivatives may be used by the Fund, and these can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.
- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Where overseas investments are held the rate of currency exchange may cause the value of such investments to go down as well as up.
- Investment involves risk. Past performance figures shown are not indicative of future performance. Investors should read the prospectus (including the risk warnings) and the product highlights sheets, before investing. Daily price change percentage is based on bid-bid price.

Benchmark disclosure

The Investment Advisor will use its discretion to invest in securities not included in the reference benchmark based on active investment management strategies and specific investment opportunities. It is foreseen that a significant percentage of the Fund's investments will be components of the reference benchmark. However, their weightings may deviate materially from those of the reference benchmark. The deviation of the Fund's performance relative to the benchmark is monitored, but not constrained, to a defined range.
