

HSBC Global Investment Funds

GLOBAL EQUITY CLIMATE TRANSITION

Marketing communication | Monthly report 31 May 2025 | Share class AD

Investment objective

The Fund aims to provide long-term capital growth and income by investing in a portfolio of shares of companies, while promoting environmental, social and governance (ESG) characteristics within the meaning of Article 8 of SFDR.

Investment strategy

The Fund is actively managed. In normal market conditions, the Fund will invest at least 80% of its assets in shares (or securities similar to shares) of companies of any size that are based in developed markets. The Fund will invest a minimum of 80% of its net assets in companies that the Investment Adviser believes are on a clear and measurable transition pathway as informed by HSBC Asset Management's proprietary climate transition assessment that evaluates a company's transition towards Net Zero ("Climate Transition Strategy"). The Fund uses a multi-factor investment process to identify and rank companies in its investment universe. All the Fund's investments are assessed for their individual carbon intensity and ESG scores to lower exposure to carbon intensive businesses and raise the Fund's ESG score. Companies considered for inclusion within the Fund's portfolio will be subject to excluded activities in accordance with HSBC Asset Management's Responsible Investment Policies, which may change from time to time. The Fund may invest up to 10% in other funds. See the Prospectus for a full description of the investment objectives and derivative usage.

Main risks

- The Fund's unit value can go up as well as down, and any capital invested in the Fund may be at risk.
- The value of investible securities can change over time due to a wide variety of factors, including but not limited to: political and economic news, government policy, changes in demographics, cultures and populations, natural or human-caused disasters etc.
- Derivatives may be used by the Fund, and these can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.

Share Class Details

Key metrics

NAV per Share	USD 17.77
Performance 1 month	7.17%
Volatility 3 years	15.11%

Fund facts

Top 10 holdings exclude holdings in cash and cash equivalents and money market funds.

Sustainability indicators	Fund	Reference benchmark
Carbon emissions intensity	74.47	98.08
UNGC breaches	0.00%	0.01%
Transition alignment	88.93%	77.83%
Implied temperature rise	2.13°	2.22°
Green solutions	44.81%	37.81%
Minimum ESG standards	98.95%	--

Carbon emissions intensity - Carbon Intensity measures the quantity of carbon emission of a company (tonnes CO²e/USD million revenue)

Source: S&P Global Trucost

UNGC breaches - All investments are assessed against the ten principles of the UNGC and the OECD. Companies that are flagged as having violated one of the ten principles of the UNGC or OECD guidelines are systematically excluded, unless they have gone through an ESG due diligence assessment, undertaken by HSBC, and are determined not to be in breach of the principles or guidelines.

Transition alignment - Companies that are positively categorised within the HSBC Asset Management proprietary climate transition assessment as either, Aligned, Aligning, or Committed to Aligning.

Implied temperature rise - MSCI’s forward looking temperature alignment metric that estimates the global temperature increase if the entire economy behaved like the companies invested in (Scope 1 , 2 and 3 carbon emissions)

Green solutions - Higher proportion of green solutions relative to the Reference Benchmark (calculated as a percentage weighted average of the green solutions of the sub-fund’s investments, relative to the percentage weighted average of green solutions of the constituents of the Reference Benchmark)

Minimum ESG standards - The percentage for which the companies that the sub-fund invests in meet minimum ESG and E, and S and G score levels

Risk Disclosure

- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Where overseas investments are held the rate of currency exchange may cause the value of such investments to go down as well as up.
- Investment involves risk. Past performance figures shown are not indicative of future performance. Investors should read the prospectus (including the risk warnings) and the product highlights sheets, before investing. Daily price change percentage is based on bid-bid price.

Benchmark disclosure

The Investment Advisor will use its discretion to invest in securities not included in the reference benchmark based on active investment management strategies and specific investment opportunities. It is foreseen that a significant percentage of the Fund's investments will be components of the reference benchmark. However, their weightings may deviate materially from those of the reference benchmark. The deviation of the Fund's performance relative to the benchmark is monitored, but not constrained, to a defined range.
