

## HSBC Global Investment Funds

# GLOBAL EMERGING MARKETS MULTI-ASSET INCOME

Marketing communication | Monthly report 31 May 2025 | Share class AM3OSGD

### Investment objective

The Fund aims to provide income and moderate capital growth by investing in a range of assets, including bonds, shares, money-market securities, other assets and cash in emerging markets.

### Investment strategy

The Fund is actively managed and is not constrained by a benchmark.

At least 90% of the Fund's exposure is to assets that are based or issued in emerging markets.

The Fund invests in investment grade, non-investment grade and unrated bonds issued or guaranteed by governments, government-related, supranational entities and companies based in emerging markets; and to shares issued by companies of any size.

Companies and/or issuers considered for inclusion within the Fund's portfolio will be subject to excluded activities in accordance with HSBC Asset Management's Responsible Investment Policies, which may change from time to time.

The Fund may invest up to 20% in Chinese bonds, up to 10% in non-investment grade bonds issued by any single sovereign issuer, up to 90% in other funds, may invest in bank deposits and money market instruments, up to 10% in convertible bonds, up to 10% in contingent convertible securities and up to 30% in China A and China B-shares. The Fund's primary currency exposure is to emerging market currencies (exposure will not be less than 50%).

See the Prospectus for a full description of the investment objectives and derivative usage.

### Main risks

- The Fund's unit value can go up as well as down, and any capital invested in the Fund may be at risk.
- The Fund invests in bonds whose value generally falls when interest rates rise. This risk is generally greater the longer the maturity of a bond investment and the higher its credit quality. The issuers of certain bonds, could become unwilling or unable to make payments on their bonds and default. Bonds that are in default may become hard to sell or worthless. The value of investible securities can change over time due to a wide variety of factors, including but not limited to: political and economic news, government policy, changes in demographics, cultures and populations, natural or human-caused disasters etc.
- The Fund may invest in Emerging Markets, these markets are less established, and often more volatile, than developed markets and involve higher risks, particularly market, liquidity and currency risks.

### Share Class Details

#### Key metrics

NAV per Share	<b>SGD 7.66</b>
Performance 1 month	<b>1.46%</b>
Sharpe ratio 3 years	<b>-0.15</b>

## Risk Disclosure

- Derivatives may be used by the Fund, and these can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.
- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Where overseas investments are held the rate of currency exchange may cause the value of such investments to go down as well as up.
- Investment involves risk. Past performance figures shown are not indicative of future performance. Investors should read the prospectus (including the risk warnings) and the product highlights sheets, before investing. Daily price change percentage is based on bid-bid price.
